PRIMARIES HELD BY PROGRESSIVE PARTY

Delegates Are Chosen to Bull Moose County and Precinct Conventions.

ATTENDANCE IS LARGE

Districts Leave Representatives Free to Choose Candidates for All Offices.

Well attended Progressive primaries were held last night in every election district in the city and county and delegates chosen to the Progressive county convention to be held next Saturday at the Garrick theater. The delegates from the districts will meet Friday evening at 8 oclock to nominate candidates for two city judgeships, for justice of the peace and constable at Judge Lewis's court room at the city and county building.

There were few contests at the primaries, though there was considerable enthusiasm. Several new deserters from the regular Republicans were welcomed with acclaim at the primaries. In several of the districts twice as many delegates were elected as were

many delegates were elected as were given the districts under the call, and each delegate was given half a vote.

There were no instructions given in any of the districts for candidates, though the Garfield delegation is said to favor Parley P. Christensen for state senator, and the eighth district went on record as favoring though not instructing for several candidates. Among them are F. A. Sweet and O. H. Hewlett for state senators, John A. Burt for representative, J. C. Corless for sheriff, A. Richter and Hyrum Nielson for commissioners, and Brigham Clegg for commissioners, and Brigham Clegg and Ben Johnson for city judges. The county committee has not yet

the Greek had shot himself twice in the throat after murdering the woman thought to have been dead for fully five ours before he was found by Patrolhours before he was found by Patrolmen Fatten and Lund. The position of the body suggested to the policemen that the Greek might be still alive and watching for his pursuers. They declare that they barely resisted an impulse to give the command, "Hands up."

Two shots were fired by the Greek into his own throat. One emerged through the front and the other at the back of his head. In the progress of his flight Tslogas had visited his room and secured a suit case containing a few minor articles of apparel and some papers. The grip was discarded within half a block of the place where the body was found.

Inquest Is Held.

An inquest over the bodies of the two victims of the shooting was held at the O'Donnell undertaking parlors by Coroner H. S. Harper yesterday. The decision was to the effect that both Mrs. Theodorson and Tsiogas had met death from shots fired from a revolver in the hands of the latter.

George Theodorson, brother-in-iaw of the murdered woman, who was with her at the time of the shooting, and who was arrested by the police shortly afterward, was released yesterday after the inquest. Theodorson explained that he was so badly rattled by the suddenness of the attack that he could not collect his wits enough to make an attempt to stop the assailant.

The murdered woman was formerly Miss Mary Whitmer, a native of Mantiblesides her mother, two little brothers and three sisters, living at No. 2 Snarr court, rear of 425 West Sixth South street; her father, Robert Whitmer, is living in Logan and two sisters in Idaho. Her husband, Jim Theodorson, is said to be in the Fort Leavenworth prison for white slavery.

Tsiogas, who was about 23 years of age, had been employed for the past two years, until two weeks ago, as a porter in the Arcade saloon, 256 South State street. He bore a reputation for sobriety and trustworthiness. For some time hefore quitting lifs job, however, he had appeared to be brooding over a secret vexation. It is said that he wished to marry Mrs. Theodorson but was prevented from doing so as she had not yet been divorced from her husband and did not seem inclined to secure a divorce to marry the enamoured Greek.

The body and personal effects of the dead man were claimed yesterday by his brother, Theros Tsiogas, living in this city. Some confusion as to the correct spelling of the dead man's name was dispelled last evening when a card was found at the Arcade bar with his signature upon it. District 1—Geo. L. Betts. A. H. After Inflicting Fatal Wounds Farmer Must Be Taught to Adapt Himself to Existing Circumstances.

> Government reclamation of arid ands was the subject of an address given last night by F. H. Newell, director of the United States reclamation service, at a meeting of the Commercial club. Mr. Newell promised to speak at luncheon Saturday.

"In the first place I wish to make hours had elapsed from the time ernment reclamation really is," said Mr. Newell in beginning his remarks.

"I have been asked so many times to explain the meaning of reclamation that I presume a short explanation will not be out of the way, even though most of you gentlemen probably are well acquainted with the ably are well acquainted with the movement."

Work Well Under Way.

The speaker then explained that the reclamation service is an agent of the secretary of the interior for the purpose of turning back waste areas so that they may become productive. He said that all the money from the sale of public lands is turned over to the reclamation department for use in this work. He declared that out of 30,000,000 or 40,000,000 acres of arid land in the country, about 1,000,000 acres have already been reclaimed, and that probably 3,000,000 acres more will be made productive in a short time. short time.

There are a number of drawbacks the service has to continually fight, and in spite of us much of our work in reclaiming desert lands have been wasted in several localities. In Colorado, Washington and right here in your own state, land reclaimed at great expense has "gone back," as we say, because of poor management. The trouble has been mainly petty bickerings. I am sorry to say that the business men have not gotten behind the irrigation movement as they should. We are not having the crop production here in the arid west that we should have. At least crops are not raised commensurate with the ex-

pense of irrigation. New Problem Ahead.

"When we started this irrigation work we thought of only two problems—legal and engineering. These have both been solved. But now we have a larger problem facing us—the human problem.

"After the farmer is placed on the land he must be made to plant the right kind of crops—those that are adapted to the soil and climate. Then all the dry farmers must be made to cease their blekerings and to work with the government to utilize the water to the best advantage. If we can give an impetus to the 'back to the soil' movement we will give Uncle Sam an added source of strongth."

Up to Few Men.

CITY AMD VICINITY

The speaker in referring to the coming Irrigation congress said that while these meetings are important, because men from all over the country interested in irrigation are to gather and discuss subjects of interest, still much that is discussed is of a general nature and real constructive reclamation work must be accomplished by a few business men. He said that no paternalism must exist on the reclaimed areas and care must be used that the right kind of men secure the lands so that the government's work will not be in vain.
